

PIRATE PLANNING

Your task is to financially plan your 30-day, pirate expedition. Answer questions to make financial decisions to develop and a costed shopping list.

Choose from the following options for your crew first. What will your budget be?

OPTION 1:
5 Crew members
All experienced pirates
Budget: \$18/pirate

OPTION 2:
15 crew members
New pirate recruits
Budget: \$8/pirate

Each of these options offer opportunities to use your budget efficiently. Ensure you can justify your decision effectively.

1. How many crew members will be on board?
2. What is your total budget?
3. How will your crew member decision save you money during your expedition? (Can crew members bring essentials?)
4. Which items from the shopping list are you choosing to purchase? Refer to Shopping Wish List.
5. Calculate your expenses total.
6. How much money do you have left over? Or how much have you over spent by?
7. What will you change to be 'in budget' and why? Remember you don't keep and excess money.
8. Justify why you chose your items.

SHOPPING WISH LIST

Choose from these items to take with you. Perhaps you will need multiple; perhaps experienced crew members can bring their own; perhaps you choose to not purchase particular items. Pirates do not keep supplies after expedition. The choice is yours.

5kg Bag of rice
\$4.30/bag

Sleeping bag
\$8 each

Can of beans
